

POLITECNICO DI TORINO

DEPARTMENT OF CONTROL AND COMPUTER ENGINEERING

Master of Science in Computer Engineering

Master Degree Thesis

# Deep Learning on Polito Knowledge Graph

Leveraging Relational GCN for link prediction between nodes of  
a newly built publications graph

## **Supervisors**

Prof. Antonio Vetrò  
Prof. Juan Carlos De Martin

## **Candidate**

Giovanni GARIFO

ACADEMIC YEAR 2018-2019

*To Monia*

*To my Grandfather*

# Abstract

Summary here, one page

# Acknowledgements

Acknowledgements here, half page

# Contents

# List of Tables

# List of Figures

# Chapter 1

## Introduction

### 1.1 First section

first section here

Le grandezze in gioco sono evidenziate nella figura ??.

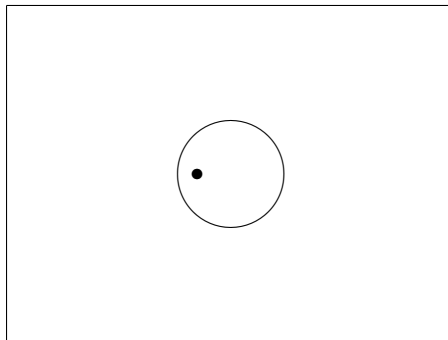

Figure 1.1. Orbita del generico satellite; si noti l'eccentricità dell'orbita rispetto al pianeta.

### 1.2 Second section

## Chapter 2

# Background

### 2.1 a section

#### 2.1.1 a subsection

## Chapter 3

# State of the art

## Chapter 4

# Approach and Methodology

## Chapter 5

# Development and Implementation

## Chapter 6

# Evaluation

## Chapter 7

# Conclusions

# Bibliography
